ClassicLine perspex frame

Displays in shops are an ideal way to achieve success with unidrain®.

The best way to display ClassicLine is to build the frame and grate into existing shop environments.

If the shop does not have any immediate plans to build unidrain® directly into a display area, we can offer a perspex display with a frame and grate that can be laid on the floor in existing display areas to give the customer a sense of how elegant unidrain® would look in their bathroom.

Moveable perspex display, incl. ClassicLine
800 mm frame in 10 mm with one
ClassicLine grate.
Product number: 256
Dimensions: 79 x 10 x 2 cm

ClassicLine grate display

To catch the customer's eye and create a dialogue with them about choosing a grate design, we can offer a grate display with room for four grates. Place near the perspex display. The salesperson or customer can then quickly and easily change the grates and decide which design suits the customer best.

- ☐ ClassicLine grate display with four 800 mm grates, incl. brochure holder. 20 brochures for inspiration.
Product number: 259
Dimensions: H: 77 x W: 39 x D: 26 cm

- ☐ Set of four 800 mm grates incl. 20 brochures for inspiration + perspex frame and one 800 mm grate.
Product number: 260
Dimensions: H: 77 x W: 39 x D: 26 cm

ClassicLine stand

The unidrain® display ClassicLine is a technical display mounted on an elegant and impressive stand. It shows the built-in principle with unidrain® in a concrete construction.

☐ ClassicLine stand with sign

Digital photo frame

A digital photo frame attracts attention to unidrain®. Mount the photo frame directly on the frame.

Choose between two presentations, both of which are available on the hard disk:

- 1| A design presentation that guides the customer through unidrain®'s elegant designs, simple product components and various beautiful design options.
- 2| A technical animation showing the floor drain being built into concrete.
